## HAND SOAP & BODY CARE

If you are one of those stores that are staying open as critical and/or necessary, we cannot thank you enough for supporting our communities and our customers!

As such, please know that DANI Naturals is here to support you in any way that we can.

We currently have stock available of hand soaps, body washes and body care products to accommodate for the increased need in our communities.

### WHY IS ALL-NATURAL EFFECTIVE FOR YOUR CUSTOMERS

DANI Naturals offers a 100% all-natural hand soap & body wash alternative that includes panthenol, arnica extract and lavender. These ingredients are powerful antimicrobials which make them great germ and bacteria fighters!

Panthenol is a naturally derived alcohol, also known as Vitamin B-5, that occurs organically and is produced from plants.

DANI hand soaps & body washes use a coconut-based cleanser that is a natural, gentle alternative to harsh sulfates.

### DANI BATH & BODY SKIN CONSIDERATIONS

In addition to keeping hands clean, customers should use a soap that maintains the skin's vital acid-mantle. This is a very fine, slightly acidic film on the surface of the skin which acts as a barrier to bacteria, viruses and other potential contaminants.

DANI soaps are key to help maintaining this fragile layer, with the added ingredients of glycerin, chamomile, aloe, lavender and arnica.
